

Portescap Highlights Ultra EC Portfolio and New Motion Innovations at Automate 2022

Visit Portescap at Booth #4149

Portescap is excited to attend Automate 2022 with colleagues from Altra Industrial Motion, including Thomson Linear and Kollmorgen, to discuss the benefits of its brush DC, brushless DC, and stepper motors for AGV's, collaborative robots, electrical grippers, surgical robotics, and other applications within the robotics and automation industries.

Portescap will showcase its Ultra EC™ motor platform, which offers miniature brushless DC motors that address ultra-high speed, ultra-high torque, and ultra-cost optimization performance requirements. It will also demonstrate two new motion innovations, the 20ECF and 32ECF. These coming soon brushless slotted flat motors provide high performance in a flat package for space-constrained applications, such as those within the automation field.

Sales and Business Development representatives will also be available to discuss Portescap's motor customization options, motion control accessories, and the Engineer-to-Engineer collaboration model.

About Portescap

Portescap offers the broadest miniature and specialty motor products in the industry, encompassing coreless brush DC, brushless DC, stepper can stack, gearheads, digital linear actuators and disc magnet technologies. Our products have served diverse motion control needs in a wide spectrum of applications including medical, life science, instrumentation, automation, aerospace and commercial for more than 70 years.

Portescap has manufacturing centers in the United States and India, and utilizes a global product development network with research and development centers in the United States, China, India and Switzerland.
